

# CaroBull & CaroBull-V

Quick and easy plunger tip

Adaptable on almost any plunger rod  
Quick change directly at DCM  
High flexibility through modular design

The bull series has been designed as a quick-change system. Mounting of different diameters with same body sizes enables cost-effective and flexible production. Pressure rings and slide bushings can be turned and reused.

## Advantages of CaroBull

- Change of plunger tip requires only a few steps
- Adaptable on almost any plunger rod with Adapter
- Quick change requires only a few steps and leads to fewer downtimes
- 2 in 1 Ring system for standard and vacuum casting
- Pressure Ring and Slide Bushing can be re-machined to next size
- Free of beryllium

## Advantages of CaroBull-V

For vacuum applications, the slide bushings can simply be replaced by the well-known circlips.

CaroBull-V Circlips
